### INTERESTING TO PLANTERS.

Dugan's combined plow, planter, chopper and cultivator will give a public exhibition at Hopefield, Arkanasa, (opposite Memphis) to-morrow, (Monday) the first. This machine has been recently invented, and has received the most flattering commendations from planters wherever exhibited. Its construction is simple, its machinery compact, its execution perfect, its strength beyond the power of miles or hands to break it, and its work is far superior and accurate than cus be performed by hand. As a full discription of this machine was given in the Appeal of recent date, we down it unnecessary at this time to give a detailed account of its many valuable qualities to the planter.
